Camp Trip Planning and Execution Workflow

This outlines the steps you should take as you book and plan your trip – a process we generally suggest starting 6-9 months in advance to allow for completion of trainings and paperwork and to allow your troop time to plan and prepare for their experience!

Step 1

•Review Safety Activity Checkpoints

•Complete appropriate trainings, recommended 6 months in advance - at leas one adult from your troop must have

Outdoors and Overnights Step 1 (virtual, required for all overnights)

Step 2

 Complete booking paperwork for your chosen camp. We recommend doing this as soon as you are able, up to a year in advance. Consult your troop to ensure your trip is troop led - what activities might you want to do? What meals might you prepare?
 Submit a troop trip application (at least 30 days in advance) required for high risk activities and overnights.

•Review policies and procedures for the camp and for Girl Scouts, including Safety Activity Checkpoints, linked below.

Step 3

•Meet with your troop to plan your schedule, including activities and meals. Consider making your kaper chart.

Checkpoints, again, a few weeks prior to your trip. •You will need permission slip
